

ACCOUNTABLE MANAGER

An **Accountable Manager** is the single individual who is designated as the person responsible to a Regulatory Authority in respect of the functions which are subject to regulation, and carried out by an aircraft operator, an air navigation service provider, an aircraft maintenance and repair organisation or an airport operator. The **Accountable Manager** is likely to rely heavily upon a small number of senior managers with subordinate executive responsibility for each area of regulated technical specialist in their organisation. These people will report directly to the **Accountable Manager** and may themselves have to be designated and approved by the Regulatory Authority as specific Post Holders. In the case of an organisation which holds an Air Operator Certificate or equivalent regulatory permission, then the responsibilities of Post Holders are likely to include **Flight Operations, Flight Training, Ground Ops, Continuing Airworthiness and Quality Assurance**.

Who is this programme intended for?

This course will provide an overview of the responsibilities of the **Accountable Manager** within an Approved Organisation. The areas covered during the course include financial responsibility, the delivery of Safety, ensuring Regulatory Compliance under the **Air Navigation Order (ANO)** and **EASA Regulations** and an overview of the future regulatory approach being adopted in Ireland.

By the end of the course delegates will demonstrate understanding of the following through presentation and interactive discussion:

- Requirements of the applicable regulations that apply to Approved Organisation holders
- Responsibilities of the **Accountable Manager** for ensuring compliance within their own organisation
- Familiarity with the key topics affecting the industry today

Programme Outline:

- Responsibilities
- Legal Implications
- Regulation development
- Management & Structures
- Performance-based Oversight
- Safety Management
- Quality Assurance
- Human Factors

Duration: 1 week. (35 contact hours)
